PROFILE

Computer Science Engineer and Full Stack Developer specializing in MERN stack and AI-powered applications. Experienced in building scalable web solutions and integrating LLMs, LangChain, and AI Agents to create intelligent, real-time systems. Passionate about developing impactful products with clean UI and efficient backend architecture.

WORK EXPERIENCE

Freelance Frontend Developer | Self-Employed

Feb 2026

Sanjeevani Clinic Website

Tech Stack: *React.js, JavaScript, CSS*

- Developed a responsive website for a healthcare clinic to showcase medical services, doctor profiles, clinic timings, and contact information.
- Integrated WhatsApp-based appointment and inquiry functionality, enabling patients to connect directly with the clinic for consultations and bookings.
- Optimized the user interface for desktop and mobile devices, ensuring accessibility, responsiveness, and a seamless user experience.
- Worked directly with the client to understand requirements and make changes based on feedback.

PROJECTS

AI Website Generator

[GitHub](#) | [Live](#)

Tech Stack: *MERN Stack, Tailwind CSS, Framer Motion, OpenRouter (DeepSeek)*

- Built an AI-powered MERN application that generates websites from user prompts and enables one-click deployment, simplifying the process of website creation for non-technical users.
- Integrated OpenRouter and DeepSeek models to generate website content and page structure based on user requirements.
- Implemented a credit-based usage system with Stripe integration, including secure checkout and webhook handling for payment verification and user credit management.

Smart Restaurant AI Agent

[GitHub](#)

Tech Stack: *LangChain, Google Gemini API, Node.js, Express.js*

- Built an AI-powered restaurant assistant using LangChain Agents that can handle menu queries, recommend meals, and dynamically fetch real-time data using custom tools.
- Designed and implemented dynamic tools (breakfast, lunch, dinner menus) and integrated Google Gemini API to enable intelligent decision-making and multi-step reasoning.
- Developed backend services using Node.js and Express.js, enabling smooth interaction between LLM, tools, and APIs for a responsive and interactive AI application.

Finance Dashboard UI

[GitHub](#) | [Live](#)

Tech Stack: *React.js, JavaScript, CSS*

- Built a modern finance dashboard interface using React.js with a clean and responsive design.
- Developed reusable components to display financial data, analytics cards, and dashboard sections.
- Designed a user-friendly layout optimized for desktop and mobile devices, focusing on usability and visual consistency.

EDUCATION

Technocrats Institute of Technology, Bhopal Bachelor of Technology — Computer Science and Engineering CGPA: 7.72 / 10.00	2022 – 2026
Gurukul Vidyapeeth, Hajipur, Bihar Senior Secondary (12th), CBSE — Stream: Science (PCM)	2020 – 2021

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, SQL, Python
- **Web Development:** HTML5, CSS3, Tailwind CSS, MongoDB, Express.js, React.js, Node.js, REST APIs
- **AI & Automation:** Large Language Models (LLMs), LangChain, Prompt Engineering, AI Agents, n8n, MCP
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Render
- **AI Tools:** Google AI Studio, ChatGPT, Antigravity

INTERESTS & ACTIVITIES

- Competitive Programming and Algorithmic Problem Solving.
- Exploring New Technologies and Software Development Trends.
- Building Personal Projects and Improving Programming Skills.
